

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF COLORADO**

DOCKET NO. 08A-532E

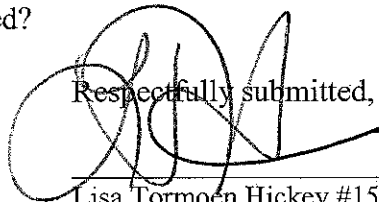

IN THE MATTER OF THE APPLICATION OF PUBLIC SERVICE COMPANY OF
COLORADO FOR APPROVAL OF ITS 2009 RENEWABLE ENERGY STANDARD
COMPLIANCE PLAN.

ISSUES OF CONCERN TO THE INTERWEST ENERGY ALLIANCE

While we do not know the extent nor the depth with which we will pursue these issues, the following are matters that currently appear to be of interest to our members.

1. Customer-sited solar resource matters: issues related to incentives, funding, procurement, compliance, market segmentation, and the retail rate cap.
2. Treatment of costs related to the acquisition of 600 MW of solar facilities with storage.
3. Treatment of SRECs associated with the anticipated 25 MW central solar facility.
4. Public Service Company's plans to invest \$15 million to own and operate PV Solar systems on customer property; and other company-owned PV.
5. Tracking, counting, and trading of RECs.
6. Calculation of costs: incremental project costs, wind predictor analysis costs and related renewable integration costs: how are these services and deliverables acquired? Are the studies peer- reviewed and published?

Respectfully submitted,

Lisa Tormoen Hickey #15046
