Colorado Public Utilities Commission  
1560 Broadway, Denver

Dear PUC Commission,

I would like to express my support for the proposal to add fuel mix and CO2 emissions information to monthly Xcel bills. I believe it is important for consumers to learn not just the dollar cost of the energy they are using but also the environmental cost. Including the fuel mix in the bill will provide more visibility to the progress that Xcel makes in switching to renewable energy sources.

I would like to see faster progress in implementing energy efficiency programs, new transmission lines to allow more wind farm sites to be created and an overall increase in the use of renewable energy. I encourage the PUC to do everything it can to make these changes a reality.

Yours faithfully,  
Matthew Hall

A handwritten signature in black ink that reads "Matthew Hall". The signature is written in a cursive, flowing style. Below the name, there is a small, stylized mark that appears to be the number "46" with a horizontal line through it.
