Colorado PUC E-Filings System

The Tariff sheets accompanying this Advice Letter No. 269 comply with the requirements of Rule 4109 of the Commission's Rules Regulating Gas Utilities and Pipeline Operators. The proposed effective date for the Tariff sheets accompanying this Advice Letter No. 269 is June 1, 2014. Sheet Nos. 10 and 11 also contain a text addition to reinstate a provision of the Rules and Regulations section that was inadvertently omitted in the prior advice letter for those Tariff sheets.

Section II.G.3 of the Amended Stipulation approved in Consolidated Proceeding Nos. 13A-0046G, 13AL-0067G and 13AL-0143 states, in full:

“A M Gas requested that Rocky Mountain's storage costs incurred by SourceGas Distribution be allocated to sales customers through SourceGas Distribution's GCA [Gas Cost Adjustment] mechanism on a zoned basis such that only those customers who benefit from storage will pay rates that include the cost of storage. SourceGas Distribution agrees to file an advice letter or application within 30 days after the Commission has approved this Amended Stipulation by which SourceGas Distribution will propose that its GCA mechanism allocate such storage costs on a zoned basis. In addition to SourceGas Distribution, the remaining Settling Parties agree to this resolution and to support such advice letter or application in concept. No Settling Party shall be prejudiced by signing this Amended Stipulation as to any position taken on the specific proposals in such an advice letter or application, as the total effects of the change concerning the allocation of storage costs are unknown at the time of the filing of this Amended Stipulation.”

SourceGas Distribution identified the customers who benefit from storage as those customers in towns and areas behind Rocky Mountain delivery points that require capacity pathed from the Wolf Creek Storage Field receipt point. The towns and areas that require Wolf Creek Storage Field capacity are as follows: Aspen, Basalt, Carbondale, Eagle, El Jebel, Gypsum, Snowmass, Snowmass Village, and Woody Creek. The GCA reflected in these proposed Tariffs incorporates a charge for storage capacity that is applicable only to customers with service addresses in and around these towns and areas. Customers who do not reside in these towns or areas will not receive the storage charge as part of their Forecasted Upstream Cost Component of the GCA.

In support of the proposed Tariffs accompanying this Advice Letter No. 269, SourceGas Distribution includes Attachment 1, which is a modified version of the exhibits from its interim GCA Application filed on March 19, 2014. The Company modified those GCA exhibits to remove the projected No-Notice Storage Reservation Costs to be recovered from SourceGas Distribution by Rocky Mountain from the Forecasted Upstream Cost Component of the GCA. The No-Notice Storage Reservation Costs form the basis of the aforementioned storage charge that is then added back to the Forecasted Upstream Cost Component of the GCA of only those customers residing in the towns and areas listed above. Although the proposed Tariff changes will not affect the total revenue generated by the Company under the Forecasted Upstream Cost Component of the GCA from what was proposed in the Company's interim GCA Application filed on March 19, 2014, customers' rates in the towns and areas listed above will increase reflecting the assignment of storage costs to those customers only. Likewise, customers' rates not in those towns and areas listed above will decrease reflecting the removal of storage costs from their Forecasted Upstream Cost Component of the GCA.

Attachment 2 to this Advice Letter No. 269 is a clean version of the proposed Tariffs implementing a separate storage charge. Attachment 3 to this Advice Letter No. 269 is a redline version of the Tariffs identifying changes from the Tariffs proposed in SourceGas Distribution's interim GCA Application filed on March 19, 2014. Attachment 4 to Advice Letter No. 269 is a draft form of notice to be provided to customers in the Western Slope GCA Rate Area.

Gas Cost Adjustment

(a) Description

Rate schedules for natural gas service are subject to a Gas Cost Adjustment (GCA) to reflect changes in the cost of purchased gas, as provided for herein. Different GCA amounts are applicable to the North Eastern, Western Slope, North Central, Arkansas Valley, and Southwestern areas as listed in Sheet Numbers 5, 5A, 5B, 5C and 5D which correspond to the Schedules of Rates listed on Sheet Numbers 7, 7B, 7D, 7F and 7H.

(b) Frequency of Change

The GCA amounts shall be subject to revision annually on November 1, to reflect increases or decreases in gas costs, such as the cost of the gas commodity and Upstream Services. Additional GCA applications may be filed at other times to revise relevant tariff sheets provided that the resulting changes equate to at least one mill (\$0.001) per therm. Said increased or decreased adjustment amounts shall be prorated as of the effective date.

(c) Determination of GCA Amounts

The GCA for each service area listed on Sheet Nos. 5, 5A, 5B, 5C and 5D will be determined as follows:

1. The gas supply cost for the period shall be determined by summing the following costs: 1) Forecasted Gas Commodity Cost Component; 2) the Forecasted Upstream Cost Component to be applicable during the GCA Effective Period; and, for the Western Slope GCA Rate Area only, 3) the Forecasted Working Gas Storage Cost Component. The Forecasted Gas Commodity Cost Component shall be the system wide average composite unit cost to the Company for purchasing, gathering, treating, and processing of gas or any other services, fees and taxes assessed, under contract or otherwise, multiplied by the Forecasted Gas Purchase Quantity received or to be received as applicable during the effective GCA period at the Colorado P.U.C. jurisdictional facilities. The Forecasted Upstream Cost Component shall be the cost of transportation and storage, net of any revenues from capacity releases, directly attributable to Company's Colorado jurisdiction during the period and the LSSRS for the Western Slope Rate Area. For the Western Slope GCA Rate Area, the cost of storage shall be allocated to sales customers on a zoned basis such that only those customers who benefit from storage will pay rates that include the cost of storage. The Forecasted Working Gas Storage Cost Component shall be the carrying costs associated with the Company's gas storage inventory for its Western Slope GCA Rate Area. The carrying cost shall be determined by applying the weighted average cost of short-term debt to the annual average of the forecasted monthly gas storage inventory balances for the GCA Effective Period. For billing presentation purposes, Working Gas Storage Costs shall be included with Gas Commodity Costs for calculating the GCA effective rate. The Company shall separately identify and account for demand and commodity costs related to each of the above listed gas supply cost categories.
