## E-UPDATE

COLORADO STATE PLUMBING BOARD

MARK BROWNE, PROGRAM DIRECTOR

### FEE CHANGES EFFECTIVE NOVEMBER 19TH, 2010

As of November 19th, 2010 certain plumbing permit fees were lowered as follows:

<b>Water heater replacement fee:</b>	<b>\$50.00</b>
<b>Back flow preventer installation:</b>	<b>\$50.00</b>
<b>Shower pan liner:</b>	<b>\$50.00</b>

The online and printable version of the permit applications have been changed to reflect these fees. The format has changed slightly as well. These permits will be found on a drop down list shown as "Residential Special" permits. If you are purchasing a new or remodel residential permit, mark water heater, backflow preventer and/or shower pan if they are part of the project, as usual. The new special permits are for water heater replacements, adding a backflow preventer to an existing home and replacing an existing shower or installing the shower pan in a house under construction by a contractor other than the plumbing contractor.
