By the Commission:

On May 8, 1964 Public Service Company of Colorado (hereinafter referred to as "Public Service") and Union Rural Electric Association, Inc. (hereinafter referred to as "Union") filed a joint application requesting that this Commission enter orders granting to Public Service and Union certificates of public convenience and necessity to own, operate, maintain and extend electric facilities to serve the public in certain areas referred to in the application and in an agreement between them attached thereto and incorporated therein by reference as Exhibit A a conformed copy of which amended as to description of Areas A, B and C marked Exhibit 1 is attached hereto and incorporated herein by reference, to enter an order authorizing said parties to exchange certain electric facilities described in said agreement; to enter an order authorizing the transfer of certain certificates of public convenience and necessity to Union; for an order authorizing and approving the agreement between the parties attached to the petition as Exhibit A; and for such other orders as the Commission might deem necessary.

The application was duly set for hearing on May 20, 1964, at the Commission's Hearing Room, State Services Building, Denver, Colorado, and notice thereof was given to interested parties, including the Towns of Firestone and Mead, which have granted franchises to Public Service. No one appeared at the hearing in protest to said applications.

Public Service is an operating public utility engaged, among other things, in the generation, transmission,

distribution and sale of electric energy in an extensive area in the State of Colorado, including various areas to the north of Denver. Union is a rural electric cooperative association engaged in the transmission, distribution and sale of electric energy, also serving in certain areas to the north of Denver in the Counties of Adams, Boulder, Gilpin, Jefferson and Weld.

The testimony of the various witnesses and the exhibits introduced disclosed that Public Service and Union have entered into an agreement subject to the approval of this Commission which settles and defines the service area of each company in a large area to the north, northwest and northeast of Denver, Colorado, in which both utilities presently have electric facilities and are rendering electric service to the public. Said agreement marked Exhibit A was attached to the joint application filed in this matter and is one and the same agreement which was introduced at the hearing as Public Service Exhibit No. 1 and is one and the same as Exhibit 1 attached to this statement, findings and order and herein referred to as Exhibit 1 amended as herein stated.

The agreement Exhibit 1 between Public Service and Union marks the culmination of many years of territorial disputes between the two utilities. Much litigation has been engaged in between the parties before this Commission, various district courts of the State of Colorado, the Supreme Court of the State of Colorado, and an application for Writ of Certiorari to the Supreme Court of the United States was denied. After many years of controversy and litigation, the parties have resolved their differences and have presented to this Commission for its approval

Exhibit 1, being the agreement setting forth the terms and conditions of the compromise and settlement entered into between the parties. This Commission looks with favor upon the voluntary settlement of such territorial disputes so long as the terms of settlement are in the public interest, and will not withhold its approval of such an agreement, if the same is in the public interest.

A map of the areas in question showing the electric lines and facilities of the two utilities together with the boundary lines of the various areas in which each of the respective utilities would serve was introduced in evidence as Public Service Exhibit 2. Generally, the compromise and settlement voluntarily arrived at by the two utilities provides that (1) Public Service will render all electric service in an area designated as Area D immediately to the north of Denver in the vicinity of Thornton, Northglenn, Westminster, Federal Heights, Broomfield, etc., and Union will sell all of its electric facilities located in Area D to Public Service; (2) that in another area in the same general vicinity designated as Area E-1 but some distance further to the north, Public Service will render all electric service with the exception that Union may continue to serve present customers up to a period not exceeding five years. After five years such customers will be transferred to Public Service. Exhibit 1 provides that, under certain conditions, such customers may be transferred to Public Service at an earlier date. Exhibit 1 provides that Union will immediately sell all of its electric facilities in such Area E-1 to Public Service and that Public Service will wheel electric energy to Union's customers during such interim five year period; that in certain other areas designated in Exhibit 1 as Area E Union will continue to render

service to its existing and future customers at existing service locations subject to certain terms and conditions in Exhibit 1 contained and Public Service will continue to serve its existing customers and will have the right to serve all future customers; and (4) that in extensive areas designated as Areas A, B and C, in Exhibits 1 and 2, to the north, the northwest and the northeast of Denver, Union will render all electric service to both present and future customers and Public Service will sell to Union all of its electric distribution facilities located within such areas and all present customers of Public Service will become customers of Union, all subject to exceptions contained in Exhibit 1.

The respective utilities have agreed that the electric facilities sold to each other shall be valued at book cost of each less a uniform rate of depreciation and the difference in such value paid on closing, as in the contract provided. The agreement contains adequate plans and provisions for the orderly transfer of customers and electric facilities so that the public will be inconvenienced as little as possible and that electric service can be continued during the transition period with a minimum interruption. An operating committee has been formed consisting of representatives of each utility to consummate the agreement as expeditiously as possible.

Both utilities presented evidence to this Commission for its consideration on all of the pertinent facts relating to present service to the consuming public as well as the manner in which future service will be undertaken by each utility.

After the sale and exchange of facilities and transfer of customers from each utility to the other, each

utility will render service to its new customers under its rates on file with this Commission.

Evidence was presented disclosing the number of customers to be transferred by each utility, to the other as well as the anticipated revenue to be obtained from the customers transferred. The evidence shows that neither utility will suffer a financial hardship from the sale and exchange of facilities and the transfer of existing customers, and that such sale, exchange and transfer will not in any manner jeopardize the financial integrity of either company.

Attached to the agreement, Exhibit 1, are various appendices setting forth the legal description of the various areas to be served by each utility. The agreement, Exhibit 1, was entered into prior to Decision No. 62653 of this Commission which determined the service areas of Poudre Valley Rural Electric Association, Home Light and Power Company and Public Service. In a few isolated and minor instances, the service area of Union, as set forth in the appendices to Exhibit 1 overlaps the service areas of other utilities determined by this Commission in said Decision No. 62653. At the hearing Union stated that it was willing that any certificate issued by this Commission to Union in this proceeding should conform to certificates previously awarded by said Decision No. 62653. Union also filed as late-filed exhibits amendments to the legal descriptions contained in said Exhibit 1 for its Areas B and C which conform to said previous Decision No. 62653 by this Commission.

The Commission and its staff were furnished with copies of Exhibit 1 a substantial time prior to the hearing

date in order that the staff of the Commission could undertake such investigation and review of the proposed territorial settlement as it deemed necessary to insure that the public interest would be protected. This Commission is fully informed of the matters set forth in the joint application and the contract Exhibit 1 and is of the opinion that the joint application and the contract submitted for the approval of the Commission is in the public interest and that the consumation of the contract and the granting of certificates will result in a substantial elimination of present and future duplication of electric facilities, will, to a large extent, do away with confusion in the mind of the consuming public as to which utility is entitled to serve in any given area, and will result in more efficient public utility service to the public involved, wherefore the contract Exhibit 1, being the agreement between Public Service and Union, should be, and it is hereby, approved in its entirety.

##### THE COMMISSION FINDS:

That the above statement be, and it is hereby, made a part hereof by reference.

That the Commission has jurisdiction of the subject matter and of the joint applicants.

That Public Service and Union are both public utilities, and are subject to the jurisdiction and regulation of this Commission.

That Exhibit 1, being the agreement between Public Service and Union referred to above, is consistent with the public interest and public convenience and necessity require that the same should be approved in its

entirety and that certificates of public convenience and necessity should issue as in the joint application prayed.

That the assignment by Public Service to Union of certificates of public convenience and necessity issued to Public Service authorizing the exercise of franchise rights in the Towns of Firestone and Mead is consistent with the public interest and should be approved.
