

**Proposed REC Adder Amounts  
Contains Highly Confidential Information**

By Decision No. C20-0506-I, issued July 14, 2020, we granted SunShare's unopposed request for extraordinary protection of certain information included in its Petition, including proposed REC Adder amounts. Therefore, SunShare's proposed REC Adder amounts are not specified in Decision No. C21-0102 and are instead set forth in this Highly Confidential Attachment A.

In its Petition, SunShare states that a REC Adder below \$0.023 cents/kWh would render its projects unworkable.<sup>1</sup> In Decision No. C21-0102, this amount is referred to as the "Lowest Viable REC Adder." In its Second Amended Highly Confidential Petition, SunShare requests a REC Adder for projects with a 2021 in-service date of \$0.026 cents/kWh.<sup>2</sup> In Decision No. C21-0102, this amount is referred to as the "Requested REC Adder."

As indicated in the Decision, we authorize Public Service to accept bids reflecting the Lowest Viable REC Adder, or \$0.023 cents/kWh.
