

The calculation of waiting time begins after the taxicab has arrived at the passenger's point of origin, and the passenger has been contacted by telephone or e-mail and advised the taxicab is at the requested pickup location. Waiting time will only be charged for the time in excess of five minutes that the taxicab driver is required to wait for the passenger. Waiting time, and the charge for waiting time, will be calculated by the taximeter.

2.15 Traffic Delay Traffic delay is calculated by the taximeter during the period the taxicab is travelling from the passenger's point of origin to the passenger's point of discharge. The taximeter calculates traffic delay based on the miles per hour the taxicab is travelling. If the taxicab is travelling at less than 15.25 miles per hour, the taximeter will calculate traffic delay at a charge of \$1.15 per one (1) minute. The taximeter will not simultaneously calculate the charge for traffic delay and the charge for mileage. 3.0 Rates and Charges Any charge incurred by High Mountain Taxi or its drivers in their provision of transportation services including but not limited to road tolls, bridge tolls, use fees, admission/gate fees and parking fees shall be added to the fare.

### 3.1 Taxi service rates and fares for Items (I), (II), and (III) of Certificate 14114
