To account for the Company's costs of water for maintenance purposes, line loss, and/or bleeding lines that are not otherwise covered by customers' bills, the Company will true-up the Resource Cost-pass-through for the period between May 1, 2018 to August 31, 2018 as follows.

Calculation of Purchased True-Up Charge

The Company will calculate the amount it has billed/collected from customers under the *Customer Usage Charge* over this period (the "Customer Billed Amount"). The difference between the amount paid to the Town of Estes for purchased water over the period ("Purchased Water Amount") and the Customer Billed Amount shall then be calculated. ("True-up Amount"). The Total Purchased Water True-Up Charge will be determined by dividing the True-up Amount by the number of customer connections during the True-Up Period. The Company will charge each customer half of the Total Purchased Water True-Up Charge ("Purchased Water True-Up Charge") for this billing cycle in November 2018 (to be collected in mid December) and January 2019.

For Period of May through August 2018:
