### RECOMMENDATIONS:

Obtain and become familiar with the Commission's Safety Rules and the Federal Motor Carrier Safety Regulations.

Do not falsify records. Keep records that accurately reflect the nature of your operations.

Ensure all drivers are fully and properly qualified before operating in commerce. Maintain a complete file for each driver documenting the qualification process.

## TRANSPORTATION SAFETY AND COMPLIANCE REVIEW

Attachment 2  
Docket No. 05G-282EC  
Decision No. C05-1258  
Page 4 of 4

RALPH LIMOUSINE SERVICE

Do not allow drivers to drive unless they have been physically examined and certified each 24 months.

Ensure that each driver maintains either (1) records of duty status pursuant to 395.8, or (2) accurate time records pursuant to Rule 7.2 of 4 CCR 723-15. Unless all the requirements of Rule 7.2 are met, drivers become subject to the general rule of 395.8. "On duty time" is defined in 395.2.

Ensure all vehicles are systematically repaired and maintained.

Establish a systematic maintenance records program for all vehicles. Maintain a complete file for each subject vehicle: identify the vehicle; record all repair, maintenance and inspection operations performed; develop and employ a preventative maintenance schedule.

Require all drivers to prepare a written inspection report for each day a vehicle is operated. Ensure each report is signed by the driver, then reviewed and certified if defects are reported.

Keep all driver vehicle inspection reports, signed, certified and reviewed as required, on file for at least 90 days.

Conduct periodic internal reviews of your driver qualification, hours of service control, maintenance, accident reporting, training, and other safety systems to ensure continued compliance with the Commission's Safety Rules and/or the Federal Motor Carrier Safety Regulations.

Return the yellow copies of the vehicle inspections, certifying that the violations thereon have been corrected.

Within 20 days, return the attached cover letter, signed by an official of the company, certifying that all of the corrections have been made.

The Commission can fine violators up to \$400 per day for every day of non-compliance. It is not the intent of this office to issue a penalty for every violation found. It is our intent that every violation be corrected to ensure the safety of the public. If an operator does not make the corrections, this office will and does seek penalty assessments.
