BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF COLORADO

Docket No. 07A-211T

IN THE MATTER OF QWEST CORPORATION'S APPLICATION, PURSUANT TO DECISION NOS. C06-1280 AND C07-0423, REQUESTING THAT THE COMMISSION CONSIDER TESTIMONY AND EVIDENCE TO SET COSTING AND PRICING OF CERTAIN NETWORK ELEMENTS QWEST IS REQUIRED TO PROVIDE PURSUANT TO 47 U.S.C. §§ 251(b) AND (c)

APPENDIX 1 to Joint Motion

(Stipulation)

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF COLORADO

Docket No. 07A-211T

IN THE MATTER OF QWEST CORPORATION'S APPLICATION, PURSUANT TO DECISION NOS. C06-1280 AND C07-0423, REQUESTING THAT THE COMMISSION CONSIDER TESTIMONY AND EVIDENCE TO SET COSTING AND PRICING OF CERTAIN NETWORK ELEMENTS QWEST IS REQUIRED TO PROVIDE PURSUANT TO 47 U.S.C. §§ 251(b) AND (c)

STIPULATION

Qwest Corporation ("Qwest"), the Staff of the Colorado Public Utilities Commission ("Staff"), and the CLEC Coalition (Eschelon Telecom of Colorado, Inc. d/b/a Integra Telecom, Cbeyond Communications, LLC, McLeodUSA Telecommunications Services, L.L.C.Inc. d/b/a PAETEC Business Services, DIECA Communications, Inc. d/b/a Covad Communications Company, tw telecom of colorado Ilc, Comcast Phone of Colorado, LLC, and XO Communications Services, Inc.) (collectively referred to as the "Stipulating Parties") have reached agreement on all issues in dispute in this docket, and stipulate to the relief set forth in the attached Exhibit 1, as described further in this Stipulation. Accordingly, the Stipulating Parties request that the Commission approve the Stipulation. Qwest has provided a copy of this Stipulation to the remaining intervenors in this case – the Office of Consumer Counsel ("OCC") and McImetro

¹ Consistent with the Commission's approval in Docket No. 10A-350T, Qwest Corporation's parent corporation, Qwest Communications International, Inc., merged with CenturyLink, Inc. on April 1, 2011. Qwest Corporation will remain intact as a corporation, though in the near future Qwest Corporation will likely change the name under which it conducts its business.

² Exhibit 1 is so named to distinguish it from the "Exhibit A," also referenced herein, that is a separate rate sheet on file with the Commission or a pricing exhibit to interconnection agreements between Qwest and other carriers in Colorado. If this Stipulation is approved, a separate filing will be made that contains a complete set of the approved rates, which will then become the rates ordered by the Commission.

Access Transmission Services, LLC d/b/a Verizon Access Transmission ("Verizon"). Both OCC and Verizon indicate they have no objection to the Stipulation.

Introduction

- 1. This matter arose in response to the Commission's Order on Jurisdiction, In the Matter of the Review of Certain Wholesale Rates of Qwest Corporation, Docket No. 04M-111T, Decision No. C06-1280 (Co. P.U.C. October 31, 2006) ("Order on Jurisdiction"). The docket in which the Order on Jurisdiction was entered is commonly referred to as the "Phase II Docket." This case also arose in response to the Commission's Order Rejecting Petition, In The Matter of Qwest Corporation's Application, Pursuant to Decision No. C06-1280, Requesting that the Commission Consider Testimony and Evidence to Set Costing and Pricing of Certain Network Elements Qwest is Required to Provide Pursuant to 47 C.F.R. § 251(B) and (C), Docket No. 07M-159T, Decision No. C07-0423 (Co. P.U.C. May 22, 2007).
- 2. Qwest filed its Application in this docket on June 6, 2007. Attached to Qwest's Application as Exhibit 1 is a spreadsheet that contains the list of services that Qwest requested be addressed in this proceeding. Some Intervenors later asked that the Commission consider other rates and services. The Commission considered comments from parties regarding the scope of proceedings and the different proposals from various parties, but has not made a determination regarding the scope of proceedings in this case.
- 3. Qwest, Staff, and Intervenors all filed testimony supporting their rate proposals and challenging the proposals of other parties.

4. Following the filing of testimony, Qwest, Staff, and several Intervenors began settlement discussions. The OCC and Verizon did not participate in these discussions.

Through these settlement discussions, the parties reached consensus on a proposed negotiated resolution for all disputed issues (i.e., the Stipulation).

Stipulation

- unbundled network elements ("UNEs") at issue in this case, as reflected in the attached Exhibit 1 (the "Stipulated Rates"). Exhibit 1 to this Stipulation reflects the current rates for disputed elements, the rates proposed by the various parties, and the Stipulated Rates. The Stipulating Parties agree that these rates are consistent with the public interest, are supported by the record of this proceeding, reflect just, reasonable, and non-discriminatory rates, and are in compliance with applicable state and federal law. Upon approval of the Stipulation, Qwest will make a filing incorporating the rates from the Stipulation into the Exhibit A pricing document currently on file with the Commission, reflecting the Commission's order setting prices in this docket and previous Commission orders setting prices in other cost dockets.
- 6. In the following paragraphs, the Stipulating Parties provide further explanation regarding the following sections of the attached Exhibit 1:
 - a. Construction charges -- section 7.8.3
 - b. Transit traffic section 7.9
 - c. -48 Volt DC Power-section 8.1.4
 - d. Collocation Transfer of Responsibility section 8.14
 - e. Network Interface Device section 9.5

- f. Multiplexing and channel performance: sections 9.6.7, 9.6.8, and 9.23.6.6
- g. Operator Services and Directory Assistance ("OS/DA") sections 10.4, 10.5, and 10.6.
- h. The proposals by Cbeyond and Staff to adjust rates by use of a productivity factor.
- i. Withdrawals of rate elements due to changes in law.
- j. Withdrawals of rate elements because the service or element is not used or is no longer being offered.
- k. Restructuring or reorganization of current charges.
- 7. Construction charges section 7.8.3. If the Stipulation is approved, the heading associated with the rate and the Individual Case Basis ("ICB") price will be removed from Exhibit A for Section 7.8.3. Each carrier's Interconnection Agreement ("ICA") describes the process for when construction charges will apply. The charges in Section 7.8.3 are not typical ICB prices as contained in other sections of Exhibit A in that: (1) interconnection facilities are typically used by both Qwest and CLEC; and (2) Qwest typically must seek Commission approval before charging a CLEC for construction of interconnection facilities. However, Qwest will continue to offer construction for interconnection facilities³ on the same terms and conditions as outlined in each carrier's ICA. Qwest will not attempt to remove this obligation on the basis that the ICB price was removed from Exhibit A on file with the Commission.

³ For example, Section 7.2.2.8.16 and Section 19 of the Qwest interconnection agreement negotiations template describes the terms and conditions for construction charges, when Qwest is allowed to charge, and the process for obtaining Commission approval.

- 8. Transit Traffic section 7.9. Qwest proposed to withdraw the rate elements in section 7.9 (§§ 7.9.1, 7.9.2, and 7.9.4) from the TELRIC process based on Qwest's assertion that, as a matter of law, transit traffic is not a service that is required to be priced at TELRIC levels pursuant to 47 USC § 251 et seq. Other parties disagreed with Qwest's position. The Parties stipulate that these rate elements will not be withdrawn, and the transit traffic elements will remain unchanged by the proceedings in this docket. Each party reserves all of their rights with respect to this issue in other contexts (including interconnection agreement negotiations and arbitrations and other proceedings). The Stipulating Parties stipulate that the resolution in this proceeding reflected in Section 7.9 of the attached Exhibit 1 shall not operate as a precedent or be binding upon or be argued against any party to this case in any future proceeding.
- 9. -48 Volt DC Power section 8.1.4. The parties filed competing proposals for the DC Power Plant rate element (§ 8.1.4.1). The CLEC Coalition proposed new rates and structures, while Qwest proposed continuing the current rates and structures. The parties differed both as to the price and whether the Power Plant rate should be assessed on a perampere-ordered basis or a per-ampere-measured basis. The Stipulating Parties stipulate that the rates utilities charge for electricity the primary component of the DC Power Usage charge (§ 8.1.4.2) has changed since the rates for this rate element were set initially. The Stipulation reflects changes to the current approved rates for DC Power Usage, based on this Commission's order in Docket No. 09AL-299E, which determined Phase 1 and 2 costs and prices for the electric utility Public Service Company of Colorado ("PSCo"). The Stipulation also reflects changes to the DC Power Plant rate.

10. -48 Volt DC Power – section 8.1.4, Measured Power Option. The Stipulation reflects changes to the structure of the DC Power rates. Under the terms of the Stipulation, the CLEC has an option to be charged either on a "measured" or on an "ordered" basis for both the power plant and power usage elements regardless of power feed size, unless the CLEC elects to retain the pre-Stipulation optional terms⁴ for measured power usage charges on power feeds greater than 60 amps with all other power usage and all power plant charges based on ordered power feed size. Under the "ordered" basis, billing for DC Power rate elements would continue to be based on the number of amperes specified in a CLEC's power feed orders. For power purchased under the "ordered" option, no interconnection agreement amendment would be required; this is the pre-Stipulation rate structure with revised rates. Under the "measured" basis, billing for DC Power rate elements is based on the number of amperes observed during periodic measurements provided to Qwest by the requesting CLEC. Qwest will offer to all CLECs requesting to obtain "measured" pricing for DC Power an ICA or ICA amendment terms containing the measured power option terms in the form of the amendment attached to this Stipulation as Exhibit 2. The effective date of the measured power rates will be the effective date of all rates approved by this Commission, and Qwest will retroactively apply these rates as of the effective date for CLECs who enter into a "measured" power amendment consistent with the terms of such amendment. Subject to the requirement for amendments and approval of the Stipulation, the Stipulating Parties stipulate that the DC Power rates for the attached Exhibit 1 will follow the following structure:

8.1 All Collocation

⁴ Prior to this Stipulation, Qwest offered to apply on a measured basis only the rate element in section 8.1.4.2.2 -- Power Usage, Greater Than 60 Amps.

					The second secon
8.1.4	- 48 Volt	DC Power			
	8.1.4.1	Power No	n-Measured		
		8.1.4.1.1	Power Plan		
-	-		8.1.4.1.1.1	Less Than 60 Amps, per Amp Ordered	\$6.55
			8.1.4.1.1.2	Equal To or Greater Than 60 Amps, per Amp Ordered	\$5.83
		8.1.4.1.2	Power Usag	je	
	4		8.1.4.1.2.1	Less Than or Equal To 60 Amps, per Amp Ordered	\$3.08
	-		8.1.4.1.2.2	Greater Than 60 Amps, per Amp Ordered	\$6.15
	8.1.4.2	Power Me	easured		
		8.1.4.2.1	Power Plan	t e	
	*		8.1.4.2.1.1	Less Than 60 Amps, per Amp Used	\$7.61
			8.1.4.2.1.2	Equal To or Greater Than 60 Amps, per Amp Used	\$6.78
	-	8.1.4.2.2		ge, all Amperages, per Amp Used	\$6.15

- 11. Collocation Transfer of Responsibility section 8.14. The Stipulating Parties reached no resolution as to rates and rate structure for Collocation Transfer of Responsibility. The Stipulating Parties stipulate to the language of a footnote to section 8.14 that states, as reflected in the attached Exhibit 1: "Rates and rate structure will apply in accordance with a carrier's existing ICA. If the desired method of accomplishing the Collocation Transfer of Responsibility is not addressed in a carrier's existing ICA, Qwest will offer and the parties may negotiate terms and conditions relating to Collocation Transfer of Responsibility with full reservation of rights."
- 12. **Network Interface Device ("NID") section 9.5.** Currently, the Exhibit A on file with the Commission contains a footnote to the NID charge that states: "The Recurring charge applies when the NID is purchased separately. Qwest has not implemented the NID recurring

charge of \$0.60 approved in Docket 99A-577T but reserves to right to assess such a charge in the future." The Stipulating Parties stipulate to add the following sentence to the end of the existing footnote to Section 9.5: "Qwest will provide notice to CLECs prior to assessing any such charge."

- Stand Alone Multiplexing, Loop Mux Combinations Multiplexing, associated 13. channel performance and interconnection tie pairs associated with Loop Mux Combinations sections 9.6.7, 9.6.8, 9.23.6.1 and 9.23.6.6. Qwest proposed to withdraw the rate elements in sections 9.6.7, 9.6.8, 2.23.6.1 and 9.23.6.6 from the TELRIC process based on its assertion that, as a matter of law, Stand Alone Multiplexing and multiplexing as part of Loop Mux Combinations are not services required to be priced at TELRIC levels pursuant to 47 USC § 251 et seq. Other parties disagreed with Qwest's position. In order to resolve this issue with respect to Docket Number 07A-211T, the Stipulating Parties stipulate to the language of a footnote to these rate elements that states, as reflected in the attached Exhibit 1: "The appearance of these rates in Exhibit A is not an offer to provide this service at TELRIC rates. This issue was unresolved in Docket No. 07A-211T, but Qwest will honor interconnection agreements containing these elements by providing these elements at the rates shown in a carrier's Exhibit A. All parties reserve all of their rights in future negotiations or arbitrations for these elements as to whether these elements are required to be provided and, if so, whether these elements are required to be priced pursuant to TELRIC principles or some other basis."
- 14. **OS/DA sections 10.4, 10.5, and 10.6.** For the elements listed in the subparts to this paragraph, as indicated in the attached Exhibit 1, Commission-approved rates and rate structure will be replaced with a consolidated rate structure, and the Stipulating Parties

at TELRIC. Also, because Qwest no longer charges for DA Branding, sections 10.4.3 and 10.4.4 are being eliminated from the Exhibit A on file with the Commission. Qwest stipulates that it will continue to provide DA Branding to CLECs, pursuant to the terms of applicable ICAs.

- a. 10.4.3 (Call Branding Setup and Recording),
- b. 10.4.4 (Loading Brand Per Switch),
- c. 10.5.5.2 (Tapes),
- d. 10.5.5.3 (Shipping Charges for Tape Delivery), and
- e. 10.6.1 and subpart elements and 10.6.2 and subpart elements (Directory Assistance options A and B).
- 15. The proposals by Cheyond and Staff to adjust rates by use of a productivity factor. Applying slightly different methodologies, Cheyond and Staff proposed that all rates not just the rates at issue in this docket be periodically adjusted to reflect increased productivity and maintain consistency with TELRIC pricing. Qwest disagreed, claiming that the rates for each rate element should be determined by individual TELRIC studies. To reconcile their differences, the Stipulating Parties stipulate that absent a subsequent change in law, no party may ask that the Commission revise, restructure, or otherwise change any rate element in the Exhibit A on file with the Commission (as amended by this Stipulation if approved) in Colorado for three years beginning on the date this Stipulation is approved by the Commission.
- 16. Deletion of Rate Elements Formerly in Exhibit A on file with the Commission due to changes in law. The following rate elements, and, when applicable, all subpart rate elements will be deleted from Exhibit A on file with the Commission due to changes in law:

- a. 9.2.3.5 (OC n Capable Loop),
- b. 9.2.7 (OC 3, 12, 48 Loop Installation Charges),
- c. 9.3.4.1 (DS1 Capable Feeder Loop),
- d. 9.4.1 (Shared Loop),
- e. 9.6.4 (OC 3 Unbundled Dedicated Interoffice Transport ("UDIT")),
- f. 9.6.5, (OC 12 UDIT),
- g. 9.6.6 (OC 48 UDIT),
- h. 9.6.9 (Extended UDIT ("EUDIT")),
- i. 9.6.10 (UDIT Remote Node/Remote Port),
- j. 9.7.4.2 (Unbundled Dark Fiber ("UDF") Loop Charges Single Strand),
- k. 9.7.4.3 (Extended UDF ("EUDF") Single Strand),
- I. 9.7.5.2 (UDF Loop Charges Per Pair),
- m. 9.7.5.3 (EUDF),
- n. 9.8 (Shared Transport, Per Minute of Use),
- o. 9.10 (Local Tandem Switching),
- p. 9.11 (Local Switching),
- q. 9.12 (Customized Routing),
- r. 9.13 (Common Channel Signaling/SS7),
- s. 9.14 (Advanced Intelligent Network ("AIN"),
- t. 9.15 (Line Information Database ("LIDB"),
- u. 9.16 (8XX Database Query Service),
- v. 9.17 (ICNAM, Per Query),

- w. 9.23.2 9.23.5 (UNE Combination, UNE-P),
- x. 9.23.7.8.4 (EEL transport OC3 UDIT Recurring Fixed and Per Mile),
- y. 9.23.7.8.5 (EEL transport OC12 UDIT Recurring Fixed and Per Mile),
- z. 9.23.7.8.6 and subpart rate elements (EEL transport OC48 UDIT Recurring Fixed and Per Mile),
- aa. 9.24 (Unbundled Packet Switching),
- 17. Withdrawals of rate elements from Exhibit A on file with the Commission because Qwest does not plan to charge or CLEC does not plan to purchase. The following elements will be deleted from Exhibit A on file with the Commission because Qwest no longer plans to charge for the service or element or CLEC has no plans to purchase the service or element:
 - a. 7.12 (LIS Forecasting Deposit) and subpart rate elements (Qwest will no longer charge),
 - b. 8.1.9.3 (Central Office Security Infrastructure, Qwest will no longer charge)),
 - 9.9 (Unbundled Customer Controlled Rearrangement Element ("UCCRE"),
 CLEC does not plan to purchase),
 - d. 9.21 (Channel Regeneration) and subpart rate elements 9.21.1 (DS1) and 9.21.2(DS3) (these rates will be deleted from Exhibit A; the Stipulating Parties acknowledge, however, that Qwest will continue to provide channel regeneration at no charge when required), and
 - e. 9.23.7.12 (Concentration Capability, CLEC does not plan to purchase).

- 18. **Restructuring or reorganization of current charges.** The following sections will be restructured or reorganized in Exhibit A on file with the Commission:
 - a. 8.6.2.1 (Adjacent Remote Collocation New),
 - b. 8.6.2.2 (Adjacent Remote Collocation –Existing) and subparts rate elements,
 are being withdrawn and replaced with 8.6.2 ICB rate applicable to both new
 and existing structure adjacent remote collocation,
 - c. 9.3.12 (Construction Fee) this rate is covered in section 9.19,
 - d. 9.20.5 (Maintenance of service) (moved to 9.20.16),
 - e. 9.20.9 (Cooperative Scheduling) and 9.20.10 (Manual Scheduled Testing)
 (moved to section 7.8.3 as rates are specific to Local Interconnection Service
 Trunk testing. 9.20.4 (Testing and Maintenance) rates withdrawn from UNE
 Miscellaneous Charges as duplicative of other 9.20 elements applicable to
 UNE testing and maintenance),
 - f. 9.20.12 (Date Change) (rate element retained with rate reference to 9.20.11
 the REDM language will clarify application), and
 - g. 9.20.13 (Design Change, per Order, per Occurrence) (\$22 rate with applicability described in Rate Elements Description Matrix (REDM)).

General Provisions

19. The Stipulating Parties agree the rates and terms of this Stipulation shall become effective upon a final Commission order approving the Stipulation or modifying the Stipulation in a manner acceptable to all Stipulating Parties. In addition, the Stipulating Parties agree that

Qwest must make an advice letter filing to appropriately reflect the terms of the Stipulation in its wholesale tariff. The Stipulating Parties could not agree in this docket on a pro forma tariff. Therefore, within sixty days of the effective date of the final Order in this docket, Qwest shall file an advice letter and proposed tariffs on not less than thirty days notice, which it believes comply with Commission tariff requirements and applicable law. Subject to the other provisions in this Stipulation, the Stipulating Parties reserve all rights to challenge or advocate for modifications to the proposed tariffs, including protesting and/or requesting that they be suspended.

- 20. The terms of each ICA govern how changes to rates and rate elements will be reflected in a party's ICA. The Stipulating Parties stipulate that the attached Exhibit 1 will be made a part of their ICAs in Colorado consistent with the change in law provisions of their existing ICAs. The Stipulation does not change or alter any ICA with Qwest without amendment unless the ICA expressly provides otherwise. If, for example, an ICA between Qwest and CLEC contains a service and rate not contained in the attached Exhibit 1, the omission of that service and rate from the attached Exhibit 1 does not alter availability of the service pursuant to the ICA containing the service and rate.
- 21. The Stipulation is a settlement of a controversy. No precedent is established by the Stipulation, whether or not approved by the Commission. The Stipulation is made only for settlement purposes and does not represent the position that any party would take if this matter is not resolved by agreement. The Stipulation may not be used as evidence or for impeachment in any future proceeding before a Commission or any other administrative judicial body, except for future enforcement of the terms of this Stipulation after approval.

Furthermore, this Stipulation does not constitute agreement, by any Party, that any principle or methodology contained within this Stipulation may be applied to any situation other than the above-captioned case, except as expressly set forth herein. No binding precedential effect or other significance, except as may be necessary to enforce this Stipulation or a Commission order concerning the Stipulation, shall attach to any principle or methodology contained in the Stipulation, except as expressly set forth herein.

- witness, if required, to seek approval and answer questions by the Commission in any hearing conducted to determine whether the Commission should approve the Stipulation.

 Furthermore, each Party represents that, except as expressly provided in this Stipulation, in any proceeding in which this Stipulation may be raised by a non-party, it will not advocate against the continued enforceability of this Stipulation and its terms and conditions. Without prejudice to the foregoing, the Parties expressly reserve the right to advocate positions different from those in the Stipulation in any proceeding other than one necessary to obtain approval of, or to implement, this Stipulation or its terms and conditions. As stated in paragraph 15 of this Stipulation, absent a subsequent change in law, no party may ask that the Commission revise, restructure, or otherwise change any rate element in the Exhibit A on file with the Commission (as amended by this Stipulation if approved) in Colorado for three years beginning on the date this Stipulation is approved by the Commission. Nothing in this Stipulation shall constitute a waiver by any Party with respect to any matter not specifically addressed in this Stipulation.
- 23. This Stipulation shall not become effective and shall be of no force and effect until the issuance of a final Commission order approving this Stipulation that does not contain

any substantial modification of the terms and conditions of this Stipulation that is unacceptable to any of the Settling Parties. In the event the Commission modifies the Stipulation, any party may terminate the Stipulation. A party terminating the Stipulation shall notify the Commission and the Stipulating Parties in writing within ten (10) days of the date of the Commission order modifying the Stipulation. In the event a Party exercises its right to terminate the Stipulation, it shall be null and void and of no effect and no force in these or any other proceedings.

- 24. In the event the Stipulation becomes null and void or in the event the Commission does not approve the Stipulation, the Stipulation, as well as the negotiations or discussion undertaken in conjunction with the Stipulation, shall not be admissible into evidence in these or any other proceedings.
- 25. The Stipulating Parties state that they have reached the Stipulation by means of a negotiated process that is consistent with the public interest, and that the Stipulation is consistent with the public interest. The Parties agree that approval by the Commission of this Stipulation shall constitute a determination that the Stipulation represents a just and reasonable resolution of the issues raised.
- 26. This Stipulation is an integrated agreement that may not be altered by the unilateral determination of any Party to the Stipulation.
- 27. This Stipulation may be signed in counterparts, each of which shall be deemed an original. This Stipulation may be executed and delivered by facsimile and the Stipulating Parties agree that such facsimile execution and delivery shall have the same force and effect as delivery of an original document with original signatures, and that each Party may use such

facsimile signatures as evidence of the execution and delivery of this Stipulation by the Parties to the same extent that an original signature could be used.

28. **Procedural Issues.** Because the Stipulation resolves all disputed issues in this docket, is unopposed, and sets forth the rationale and evidence upon which the Commission can issue a decision that the Stipulation complies with applicable law, the Stipulating Parties believe that a hearing to approve the Stipulation may not be necessary. Accordingly, the Stipulating Parties do not request a hearing to approve the Stipulation, unless the Administrative Law Judge or the Commission have questions about the Stipulation. As such, to the extent acceptable to the Commission, the Stipulating Parties request approval of this Stipulation without further hearings or testimony.

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF COLORADO

Docket No. 07A-211T

IN THE MATTER OF QWEST CORPORATION'S APPLICATION, PURSUANT TO DECISION NOS. C06-1280 AND C07-0423, REQUESTING THAT THE COMMISSION CONSIDER TESTIMONY AND EVIDENCE TO SET COSTING AND PRICING OF CERTAIN NETWORK ELEMENTS QWEST IS REQUIRED TO PROVIDE PURSUANT TO 47 U.S.C. §§ 251(b) AND (c)

EXHIBIT 2 to Stipulation

(DC Power Amendment Template)

to the Interconnection Agreement between Qwest Corporation and [insert CLEC name] for the State of Colorado

This Amendment ("Amendment") is to the Interconnection Agreement between Qwest Corporation ("Qwest"), a Colorado corporation, and [insert CLEC name] ("CLEC") (collectively, the "Parties").

RECITALS

WHEREAS, the Parties entered into an Interconnection Agreement, for service in the State of Colorado, that was approved by the Commission on [insert date]; and

WHEREAS, the Colorado Public Utilities Commission in Docket No. 07A-211T, In the Matter of Qwest Corporation's Application, Pursuant to Decision Nos. C06-1280 and C07-0423, Requesting that the Commission Consider Testimony and Evidence to Set Costing and pricing of Certain Network Elements Qwest is Required to Provide pursuant to 47 U.S.C. § 251(b) and (c), issued an order relating to collocation and power on [insert Date] ("Commission Order" or "Order"); and

WHEREAS, the Parties agree to amend the Agreement with the terms and conditions contained herein.

AGREEMENT

NOW THEREFORE, in consideration of the mutual terms, covenants and conditions contained in this Amendment and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree as follows:

1. Amendment Terms

The Agreement is hereby amended by adding terms, conditions, and rates for DC Power as set forth in Attachment 1 and the Power Usage Reporting Form to this Amendment, attached hereto and incorporated herein by this reference.

By signature on this Amendment, CLEC has elected to self-certify its power usage for all Central Office based collocations in the State of Colorado, (with the exception of Virtual) whether the power feeds terminate to a BDFB or a Power Board, under the terms and conditions of this Amendment. Terms and conditions apply to all Central Office based collocations for DC Power for both Power Usage and Power Plant rate elements.

2. Effective Date

This Amendment shall be deemed effective upon Commission approval; however, the Parties agree to implement the provisions of this Amendment upon execution. And further, if executed within 30 days of the effective date of the Commission Order in Docket No. 07A-211T and CLEC provides the initial completed Power Usage Reporting Form within 30 days after execution of this Amendment, the Parties

acknowledge that the Effective Date of the rate elements in this Amendment will be the effective date of the Commission Order.

3. Further Amendments

Except as modified herein, the provisions of the Agreement shall remain in full force and effect. Except as provided in the Agreement, this Amendment may not be further amended or altered, and no waiver of any provision thereof shall be effective, except by written instrument executed by an authorized representative of both Parties.

4. Entire Agreement

Other than the publicly filed Agreement and its Amendments, Qwest and CLEC have no agreement or understanding, written or oral, relating to the terms and conditions for DC Power in the State of Colorado.

The Parties intending to be legally bound have executed this Amendment as of the dates set forth below, which may be in multiple counterparts, each of which is deemed an original, but all of which shall constitute one and the same instrument.

NOTE: The numbering in this Attachment 1 (which may not be consecutive) is used as a convenience to the Parties and may not be related to the numbering of the remainder of the Agreement.

SECTION 8.0 - COLLOCATION

8.2 Terms and Conditions

8.2.1 Terms and Conditions - All Collocation

- 8.2.1.30 Optional DC Power Measurement and Self Certification. The following terms and conditions apply to a CLEC that elects to be billed for Power Plant and Power Usage (collectively "DC Power") on a measured usage basis using self certification. These terms and conditions provide for (i) the billing of DC Power charges on a measured usage basis; and (ii) CLEC self-reporting of power consumption to Qwest for billing associated with these DC Power charges. Notwithstanding any other provision set forth elsewhere in this Agreement, these terms and conditions replace any and all terms under which Qwest has been billing CLEC for DC Power prior to this Amendment, including any existing arrangement for measured power. These terms and conditions apply to all central office-based collocations in the State of Colorado for DC Power.
 - 8.2.1.30.1 CLEC orders DC Power Cables with 20 amps per feed minimum. Qwest will continue to apply the current fuse for power delivery arrangements at a minimum of 125% of the amperage of the ordered capacity of the power delivery arrangement. CLEC will measure power usage according to the self-certification terms provided below. Qwest shall bill DC Power charges based on the reported measured usage at the applicable Commission-approved rates for measured DC Power.
 - 8.2.1.30.2 CLEC Measurement and Self Certification. On an annual basis, CLEC will report the usage for all of its Colorado Collocations, using the "Power Usage Reporting Form" appended.
 - 8.2.1.30.2.1 The Power Usage Reporting Form will include usage measurements for all the CLEC's Colorado Qwest central office-based collocations. Any disagreement between the Parties regarding the list of collocations identified in CLEC's initial Usage Reporting Form will be resolved between the Parties before any readings will be accepted for billing purposes.
 - 8.2.1.30.2.2 CLEC and Qwest will agree on a date certain by which CLEC will be required to submit its annual usage report. CLEC's annual usage report must include readings for all of CLEC's Qwest collocations in Colorado based on physical site measurements of the total actual usage of both the A and B feeds

no more than 120 days before the report's due date. Qwest will process service orders related to the DC Power Delivery Arrangements reported usage, and begin billing on a measured basis as per 8.2.1.30.2.5 below.

CLECs that execute this Amendment within 30 8.2.1.30.2.3 days after the effective date of the Commission Order in Docket No. 07A-211T, and provide the initial completed Power Usage Reporting Form within 30 days after execution of this Amendment are eligible to receive billing credits based on the usage reported in CLEC's initial readings that shall apply back to the effective date of the Commission Order. The credits shall be equal to the difference between the DC Power charges paid by CLEC and the charges that would have been billed CLEC under this Amendment during the true-up period. CLECs not meeting the above requirements will not be eligible for billing credits and will be billed on a measured basis effective the first day of the month following the date certain that the Parties agree CLEC will submit its annual usage report.

If CLEC fails to submit a reading for one or more 8.2.1.30.2.4 collocation arrangements, Qwest will promptly notify the CLEC identifying the collocations for which no reading was received. No billing adjustments will take place until all readings that are due in this period are accurately submitted. Billing adjustments will be made retroactive to the date the readings were due.

8.2.1.30.2.5 Qwest will bill the measured power usage and power plant rate based on the measured usage reported in CLEC's Power Usage Reporting Form beginning the 1st calendar day of the month following the due date of the report.

In the event that any fuse position cannot be 8.2.1.30.2.6 accessed by the CLEC, CLEC will notify Qwest of its inability to access the fuse position and Qwest shall agree to perform the measurement unless Qwest takes corrective action that enables CLEC to access the fuse position, in which case Qwest shall notify CLEC of its corrective action. Due to the uniqueness of Virtual collocation arrangements, Qwest will perform the power usage reading on all CLEC's Virtual collocations. In the event that Qwest performs the usage measurement reading under this section, Qwest will submit its measurement reading to CLEC within 60 Days of (i) the date the measurement is taken; or (ii) the date of CLECs's notice of its inability to access a fuse position, whichever is earlier. If CLEC disputes Qwest's reported measurement, the Parties may agree to a joint reading or, if that does not resolve the issue, either Party may seek to resolve the dispute under the dispute resolution provisions of this Agreement.

New collocation arrangements subsequent to the 8.2.1.30.2.7 Effective Date of this Amendment will be subject to the terms of this Amendment. For such arrangements, CLEC is responsible for notifying Qwest promptly when DC Power begins to be used in the new collocation. If CLEC fails to submit the Power Usage Reporting Form for any new collocation within 90 calendar days from the Ready For Service (RFS) date for the new collocation, Qwest will notify the CLEC advising that Qwest has not received the Power Usage Reporting Form. Billing for the new collocation will be based on the amperage capacity of the DC Power cables ordered for that new collocation unless and until CLEC submits the Once the reading for a new collocation required reading. arrangement is received, CLEC's bill shall be adjusted prospectively on the next month's bill to reflect the measured usage rate and reported usage for that new collocation. However, if CLEC submits the Power Usage Reporting Form for the new collocation within 90 days after the RFS date, the measured rates for that collocation shall be effective retroactive to the RFS date for that collocation and any true-ups shall be reflected on the monthly bill immediately following receipt of CLEC's reported usage.

CLEC may use an approved power vendor, or its 8.2.1.30.2.8 own qualified personnel, to perform the reading of DC power usage in a collocation arrangement, except a Virtual Collocation.

Physical measurements shall be taken on the 8.2.1.30.2.9 supply side of the DC Power Delivery Arrangement at a point prior to the Power Delivery Arrangements' cabling terminating on collocation equipment. Each feed shall be identified by providing the relay rack number of the Qwest power board or BDFB and the fuse position.

8.2.1.30.2.10 In the event of an increase or decrease of power usage for DC Power as defined by this subsection, CLEC will notify Qwest of the change as follows. CLEC will notify Qwest of a known increase in CLEC usage for DC power since the last reading if the actual increase in usage is 10 AMPs or greater over the last reading amount. CLEC will notify Qwest of a known decrease in CLEC usage for DC power since the last reading if the actual decrease in usage for the arrangement is 10 AMPs or greater from the amount of the last reading. CLEC will provide such notification within 30 Days of the triggering event that caused the change in usage. Qwest will update the billing to account for the increase or decrease in CLEC power usage on the next billing cycle from the date that CLEC provided the notice.

Qwest Audits. Qwest may, up to twice in each calendar year, dispute CLEC's actual usage reported in CLEC's Power Usage Reporting Form. Qwest will notify CLEC in writing of any alleged

discrepancies of plus or minus 10% or more, provided the discrepancy is Qwest's notice of discrepancies shall contain at least 10 AMPs. identification of the specific collocation arrangements(s) at issue, the amperage amount CLEC reported in its Power Usage Reporting Form, the amperage amount alleged by Qwest, and the date that Qwest measured the power used as the basis for the discrepancy notification. Qwest and CLEC shall attempt to resolve any such discrepancies reported by Qwest and may agree to conduct a joint measurement. the Parties are unable to resolve the discrepancy, either Party may seek resolution under the dispute resolution provisions of this Agreement. The same notice and dispute resolution requirements apply to any discrepancies identified by CLEC with respect to Qwest's reported usage for those collocations in which measured billing is based on Qwest's measurement of CLEC's power usage. For purposes of this section and subsection, a "confirmed" usage discrepancy is one (i) on which both Parties mutually agree; or (ii) that is established through the dispute resolution process.

If confirmed discrepancies of greater than 20% 8.2.1.30.3.1 occur twice within a 4-year period for a specific collocation, provided the confirmed discrepancy is at least 10 AMPS, the power plant charges to the CLEC for that collocation will revert to non-measured billing based on ordered cable amperage at the Commission-approved non-measured rates for a 12-month period before the CLEC will again be eligible for measured power at that collocation.

8.2.1.30.3.2 If 15% or 2 collocations, whichever is higher, of CLEC's total collocation count in Colorado, excluding those collocations for which Qwest measures usage, are found to have confirmed discrepancies of greater than 20% in a calendar year, provided the discrepancy at each site is at least 10 AMPS, billing to the CLEC will revert to non-measured power for all collocation Power Delivery Arrangements in Colorado for a 12-month period before CLEC will again be eligible for measured power.

Before adjusting any bill, Qwest will provide CLEC 8.2.1.30.3.3 with the results of any validation activity by Qwest pursuant to Section 8.2.1.30.3 that Qwest determines may result in billing adjustments.

Any billing adjustments under Section 8.2.1.30.3 8.2.1.30.3.4 must be based on confirmed discrepancies as defined in that Before any such billing adjustment is implemented, CLEC may provide Qwest with information, such as mitigating factors, showing that adjusted billing is not warranted. dispute is not resolved, either Party may pursue the dispute under the dispute resolution procedures of this Agreement. During the pendency of any such dispute, Qwest shall not apply any of the adjustments described in Section 8.2.1.30.3. Qwest reserves the

right to true-up to Qwest's measured usage back to the last CLEC certification date if it is determined that Qwest's measurement was correct.

8.3 Rate Elements

8.3.1 Rate Elements - All Collocation

- charges, as described below 8.3.1.1 Measured -48 Volt DC Power include -48 Volt DC Power Plant and -48 Volt DC Power Usage.
 - Measured -48 Volt DC Power Plant charge provides -48 8.3.1.1.1 Volt DC power to CLEC collocated equipment. The DC Power Plant charge recovers the cost of the capacity of the power plant available for CLEC's use. Qwest will apply the Power Plant per Amp Used rate in Exhibit A to the quantity of power usage reported by CLEC. Power usage will be measured as described in Section 8.2.1.30 of this Amendment.
 - 8.3.1.1.2 Measured -48 Volt DC Power Usage charge recovers the cost of the CLEC's power usage. Qwest will apply the Power Usage per Amp Used rate in Exhibit A to the quantity of power usage reported by CLEC. Power usage will be measured as described in Section 8.2.1.30 of this Amendment.
 - 8.3.1.1.3 Billing adjustments as a result of this optional process will not be subject to performance measures and remedies, if any, contained in this Agreement or elsewhere.
