ERRATA NOTICE

Decision No. C93-494
(Adopted Date: May 5, 1993)

Delete paragraph 22 located at the bottom of Page 9 and at the top of page 10 in its entirety, and insert in lieu the following:

22. There can be no doubt that the Commission has broad authority to review and approve DSM programs. The DSM programs under consideration, when implemented, should serve to encourage the efficient use of energy by all classes of customers. The adoption of energy efficient measures should assist in ensuring that there will be an adequate supply of energy for the company's customers and should ease the pressure on Public Service Company of Colorado to build new energy production facilities. This, in turn, would be beneficial to ratepayers by operating to control costs and rates.
