To Whom It May Concern:

I am writing in support of Midtown Express receiving approval to operate non-emergency medical transportation in the counties served by and for those clients served by LogistiCare. LogistiCare presently serves Medicaid recipients in the counties of Adams, Arapahoe, Boulder, Broomfield, Denver, Douglas, Jefferson and Larimer.

I would like to see the application amended to indicate that they would be available to all counties served by LogistiCare for Medicaid transportation. Furthermore I would like to see them have the ability to add up to 2 more vehicles in the future.

We have seen a steady increase in the number of daily Medicaid trips and believe this trend will continue, indicating that we will have a continued need for additional transportation resources. Midtown Express presently provides service and is in compliance with LogistiCare requirements.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven M. Feist".
