SALES OF NATURAL GAS BY COMMUNITIES

1. Report below the information called for concerning sales of gas in each community of 10,000 population or more, or according to operating districts or divisions constituting distinct economic areas if the respondent's records do not readily permit reporting by communities. Except for state boundaries, community areas need not hold rigidly to political boundaries and may embrace a metropolitan area and immediate environs. The information called for by this schedule, however, may be reported by individual communities of such size as required by a state regulatory commission concerned. Report in total for each state, sales by classes of service in other communities of smaller size. For main line sales to residential and commercial consumers, report these also in total by states. Do not include in this schedule field and main line sales to industrial consumers. These should be reported in the schedule, Field and Main Line Industrial Sales of Natural Gas, page 519 of FERC Form No. 2.
